Bunker Adjustment Factor (BAF): The BAF level per TEU is based on globally tracked average fuel price values including 0.5% and 0.1% sulfur content. BWL utilizes four global port averages (Singapore, Rotterdam, Fujairah and Houston). BAF level listed are applicable bi-directional. Countries listed on the trade lane definitions page of the document are tied to geographical trade lanes, as indicated.

Review Period: Blue World Line BAF is adjusted quarterly, based on calendar quarter validity. A 30 day notice is given before the newly effective BAF levels are applicable. Data points collected, based on average daily rates of fuel price values over 90 days prior to the 30 days notice period, one month offset to calendar quarters.
